EXPERIENCE

AthleteIQ | Founder & Lead Engineer · athleteiqhq.com

Jan. 2026 - Present

- Built and deployed a multi-tenant AI sports platform, live since January 2026 across 21 academies with 596 registered athletes. First documented deployment of ACWR injury-risk monitoring at an Indian grassroots academy, written up as a peer-reviewed deployment study.
- Solo full-stack build (React, FastAPI, PostgreSQL with row-level security, Groq LLM). Wrote the risk engine: ACWR, a personalised baseline-deviation method covering ACWR's 28-day cold start, and a coach-versus-athlete deception check.

Gruve AI | Applied AI Engineer

Jun. 2026 - Present

- Built runtime proxy layers on Gruve's PulseAI platform, cutting token latency across multi-tenant GPU clusters.
- Deployed agentic AI assistants into the Cisco Secure AI Factory pipeline, with no client data leaving their environment.

NVIDIA, Quadro Team | Tools Development Intern

Jul. - Dec. 2025

- Found and fixed a deep-learning verification model failing under changing ambient lighting in a production GPU-driver test pipeline, unblocking regression checks that had been failing silently. Built the Python test automation across 150+ testcases, retained as the team's standard QA tooling.

Persistent Systems | Software Development Intern

Oct. 2024 - Apr. 2025

- Built and evaluated ML pipelines for enterprise clients, covering classification and time-series forecasting on client datasets (Python, scikit-learn, Pandas).
- Shipped production modules in Agile sprints with full unit-test coverage and on-time delivery.

EDUCATION

MIT World Peace University, Pune | B.Tech. in Computer Science and Engineering

Oct. 2022 - May 2026

- CGPA 7.96/10.0, **First Class with Distinction** · **GRE 329/340** (Quant 168/170) · IELTS 7.5
- **Best All-Rounder Award** (University Gold Medal) and **Best Incoming Student Award**, MIT-WPU.
- **A+** in Machine Learning, Artificial Intelligence, Cognitive Computing & NLP, and Information & Cyber Security; **O** (highest band) in Capstone Project and Industry Internship.

PUBLICATIONS (FIRST AUTHOR)

Subject-Disjoint Cross-Dataset Evaluation of CNN and CNN-LSTM Models for Visual

Presented · [Project Page](#)

Driver Drowsiness Detection | MAI 2026, Springer LNEE

- Cross-dataset evaluation under subject-disjoint splits, a stricter protocol than standard within-dataset benchmarks.

When Prompt-Injection Detectors Meet New Data: A Leakage-Free Cross-Corpus Evalua-

Under review

tion | IEEE TPS 2026

- Attack recall falls from 0.92 in-distribution to 0.61 cross-corpus across five independently sourced corpora, so high benchmark scores overstate real-world performance.

A Smart Helmet for Two-Wheeler Navigation under GNSS Denial: Route-Aware Dead

Under review · [Project Page](#)

Reckoning and Road-Scene Segmentation | IEEE INDICON 2026

- 19.7% lower peak position error than unaided dead reckoning across 47 paired GNSS blackouts on an instrumented road ride ($p = 0.002$); 0.856 road IoU on unseen BDD100K.

A Reversible PII-Redacting Proxy for DPDP-Compliant Use of Third-Party LLM APIs |

Under review

IEEE DELCON 2026

- Redacts and restores PII around third-party LLM calls, built for compliance with India's DPDP Act 2023.

PROJECTS

SkillMatch | Two-Sided Hiring Marketplace

[Project Page](#)

- Availability-aware k-NN and semantic matching with explainable scores; contact gated behind mutual interest.

LinguaNova | Multilingual AI Language Learning

[Project Page](#)

- Gemini-based speech-to-text language tutor. 3rd of 150+ teams, RenAIssance Hackathon.

SKILLS

Languages: Python, JavaScript, C++, SQL | **ML & AI:** PyTorch, TensorFlow, scikit-learn, XGBoost, OpenCV, SHAP, NLP

LLMs & GenAI: Groq, LangChain, HuggingFace, RAG, prompt engineering | **Systems:** FastAPI, React, Supabase, Docker, GitHub Actions, PyTest

AWARDS & RECOGNITION

Shiv Chhatrapati Award, Maharashtra's highest sporting honour.

9x National Gold Medalist and National Record Holder, inline skating.

World Games 2024: Silver and Bronze for Team India. World ranked 6th and 7th. Asian Games 2023, 7th.

Hackathons: RenAIssance (3rd of 150+), HackAlthon (3rd), Data Quest (2nd).
